

Clark Forklift Part

Clark Forklift Part - Performing globally, there are at this time 350,000 Clark forklifts and lift vehicles in operation, with more than 250,000 of those in use in North America. Clark has five major lines of lift trucks across the world, making it one of the most expansive companies in the industry. Heavy duty trucks ranging from 1,500lb to 18,000lb capacities, dual fuel, petrol, LPG, hand powered trucks, narrow-aisle stackers and electric riders are some of their specialties.

Clark Totalift, handles more than 120,000 individual components designed for 20 exclusive models of lift trucks and automated equipment. Your regional Clark Supplier is your complete source for availability of all your components requirements provided by Clark Totalift.

Clark's exceptional Parts Distribution Centers are conveniently located in Louisville, Kentucky, which serves both their clients and dealers in North America, and Changwon, South Korea, which handles their Asian sellers and customers. For over 90 years, Clark has surpassed industry standards, being one of the most actively advancing producers. Driven to offer the highest level of value and service to our users, Clark remains on the cutting edge when it comes to enhancing productivity and benefiting performance.

Clark Totalift has a very amazing worldwide support network. With over 550 locations worldwide, seller representation in over 80 countries and 230 locations in North America, their high level of commitment to their consumers predominates the material handling market.

Clark proudly remains an innovative leader of the material handling industry, revolutionizing safety features such as the worker restraint system. This exceptional dedication to safety is now a customary feature on every lift truck.

Clark has a unyielding goal to possess the No. 1 quality system in the industry which is demonstrated by their dedication to ISO standards. Clark, is the first manufacturer of forklifts and lift vehicles to be globally certified with quality standard ISO 9001 in all of its manufacturing facilities. Furthermore, the ISO 14001 Environmental Conservancy System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement enables Clark to be ready for any number of environmental restrictions, thus placing them in a prevailing market position.

Clark has selected the very economical and advantageous system of "Lean Production" for its assembly plants and use of resources. This system was established to acknowledge the most effective approaches of manufacturing plant stewardship and ensuring maximum proficiency. Clark has completed this transition of its Korean facility. COPS which is Clark Optimized Production System, equally focuses on quality of product and services and production efficiencies.

Clark's product engineers and suppliers communicate together to improve the effectiveness and excellence of their merchandise while minimizing expenses. The contemporary value engineering program combines innovative product improvement and provides improved consumer support and service within the industry.
