Doosan Infracore America is the fastest developing forklift and lift truck company in the North American market, thanks to its exceptional level of product performance and their persistently high level of client support and service given to all Doosan Infracore Forklift clients. The U.S. lift Truck division based in Cleveland has a skilled team knowledgeable in Product Sales, Purchasing, Advertising, Logistical and Technical Support.

Korea's initial home-based lift truck market was an open-import enterprise. In the 1960's, Korea Machinery Co. Ltd. began to import assembled lift trucks as part of a national machinery expansion project. Initial sales of this manufacturing equipment focused on large business communities, the armed forces and on state-run corporations. This ultimately led to a unification with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division commenced business operations throughout Korea to service and sell this heavy equipment. By 1978, a forklift production plant was successfully completed. Continuous technical education grew to become the new focus for enhancing quality and product development.

Home-based lift truck trade for Daewoo started in 1967 and grew to an astonishing 90% market share in Korea. By the 1980's, Daewoo's sophisticated technological enhancements combined with sales success placed them in a situation of considerable growth of their forklift operations.

In 1981, Caterpillar Industrial Inc. of the United States, proposed a joint venture project to counter act competitive pressures in the US materials handling industry. This project radically expanded Daewoo's forklift sales. Construction was completed in 1984 to facilitate a new plant which helped establish the company for the manufacture of high end added-value goods suitable for export. In 1993, the company had a international sales network and started exporting designs they had established through in-house technology, as an independent product. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing expansion opportunities into overseas marketplaces.
